

## New Utility Brown Out Kit

---

The New Utility Brown Out Kit provides an option for areas that regularly experience utility brown outs by increasing the threshold that the utility power must achieve before allowing drop out or pick up, ensuring the proper voltage is fed into the transfer switch coils.

### MAIN FEATURES

- Includes 240V relay timer, 8 position, 600V, 10 amp socket relay and associated hardware
- Allows the nominal voltage pick up percentage to be increased to 90%
- Allows the nominal drop out, pick up percentage to be increased to 95%

### Compatible with:

- RTSD switches (100-400 amps)
- RTSX switches (100-400 amps)
- RTSE switches (100-400 amps, including CSA models)
- RTSN switches (100-400 amp, single phase)
- All pre-wired switches (EZ switches)

**Launch Date: November 7th, 2012**
