

Home Power Systems Named in Rochester's Chamber of Commerce Top 100

10-year consecutive Generac Premier generator reseller Dealer ranks 60th out of Rochester's 100 most progressive private businesses.

Home Power Systems owner, Jim Swetman states "with our only focus on standby generators, we have perfected the methods of execution services for new installs as well as our laser-focused process and procedures for service."

FARMINGTON, N.Y. (PRWEB) NOVEMBER 08, 2019

Home Power Systems, in business for 16 years, and Generac Premier reseller for the last 10 years, has been named number 60 of the 100 top businesses in the area. The 33rd annual list, determined by the Rochester Chamber of Commerce, celebrates the most rapidly excelling, privately-owned companies in the Rochester region. Selling and servicing Generac home generators throughout central and western New York, Home Power Systems surpasses Generac Premier Dealer status requirements, essentially representing the Generac brand at large to their customers.

To achieve this recognition, Home Power Systems has maintained their private status, operating out of the Finger Lakes region and grossing at minimum \$1 million in the last three consecutive fiscal years. In conjunction with the other 99 businesses on the list, Home Power Systems has contributed to providing over 30 people with employment in

the Rochester area. This is the second year in a row that Home Power Systems has appeared on the list.

Home Power Systems maintains 16 certified generator technicians along with work in its Commercial Power Systems division. Backed by over 35 years of experience and a team mainly comprised of those holding electrical master licenses, their dedication to quality, integrity, and trust has garnered them over 7000 customers in New York State.

Home Power Systems' President, Jim Swetman, largely credits the company's emphasis on customer service for their success, stating "with our only focus on standby generators, we have perfected the methods of execution services for new installs as well as our laser-focused process and procedures for service, maintenance, and warranty repairs. This culture has allowed Home Power Systems to be one of the top 15 Generac Dealers in the nation and provide our customers the best customer service...".

The Rochester Chamber of Commerce Top 100 list celebrates the entrepreneurial spirit of the region. The standard of excellence held at Home Power Systems rightfully exceeds this expectation.
